Douglas T. Ewing and Associates, Inc.

Labor Categories

Electrician

Ewing and Associates, Inc. electricians work solely on critical power applications. Typically they have or are qualified to have a master's certification, typically with 5 or more years of practical experience. More importantly they have experience working around Data Centers, Uninterruptible Power Supplies, battery installations, Automatic Transfer Switches and generator plants. Our normal projects typically require well planned cutover in short time frames so they must be able to think through projects and prepare sites accordingly.

UPS Technician

Ewing and Associates, Inc. UPS technicians have been through electronics training either at a school like RETs or in the Military. They also go through GE's training program (120 hours). Often they have been through other UPS manufacturers such as MGE, Liebert or Powerware schools before coming to GE or MBC. Technicians are capable of moving critical load off the UPS without disruption to the load and servicing or repairing the UPS. They have a thorough understanding of other related systems such as generators, ATS and batteries.

Battery Technician

Ewing and Associates, Inc. battery technicians have been through electronics training either at a school like RETs or in the Military. They also go through battery training program (60 hours) through C&D, Power or East Penn. They are familiar with both UPS and – 48 VDC systems. They are also trained in OSHA and hazardous waste applications and requirements.

ATS Technician

Ewing and Associates, Inc. ATS technicians have been through electronics training either in an industrial arts program or in the Military. They also go through Zenith Controls or other ATS manufacturers training program (60 hours). Technicians are capable of moving critical load without disruption to the load. They have a thorough understanding of other related systems such as generators, UPS and batteries.

Generator Technician

Ewing and Associates, Inc Generator Technicians have been through diesel mechanic technical school, usually in the military. They are capable of repairing both gas and diesel engines. They also have gone through several Generator manufacturers like Katolight or CAT training programs to learn the relationships with the engine and generator end to include all control, pump, tank, control voltage and output voltage systems. They also have a working understanding of ATS, UPS and multi-module systems. Typically a Ewing generator Technician will have at least 5 years training in the field to include military service time.
